

How the pharmaceutical industry is tackling 'severe' suffering in animals used in science

An online event co-organised by EFPIA and the RSPCA

Wednesday 26 January 2022: 14:30 - 16.00 CET

About this event

Any level of animal suffering is obviously a concern for everyone, but suffering classified¹ as 'severe' is of greatest concern. There is widespread support within the scientific community for working to reduce, and ideally end, severe suffering. This free 90-minute webinar will share and showcase some of the positive and practical steps that have been taken by the pharmaceutical industry aimed at avoiding or reducing 'severe' suffering in animals used in research and testing. The event will include case study examples and a panel discussion of some current challenges and how these are being overcome.

Register [here](#) before the 24th January

¹ e.g. under EU Directive 2010/63/EU
